Nadcap® Accreditation for Non Metallic Materials Testing Has Been Awarded to DatapointLabs

Nadcap® recognizes DatapointLabs for its commitment to continual improvement in aerospace quality

On December 22, 2021, DatapointLabs received Nadcap® accreditation after successfully passing a Nadcap® audit in Non Metallic Materials Testing.

This achievement is important for DatapointLabs as it demonstrates the company's commitment to delivering the highest standards of materials testing to the industries we serve. "With the increasing reliance on composite materials, particularly in the aerospace sector, it was the right time for DatapointLabs to pursue this accreditation," said Will Liguori, Quality Manager. Our online test catalog has been updated with composites-specific test IDs, which are aligned to standards included in our Nadcap scope of accreditation. Click here for more information about our quality system.

Jay Solomond, Executive Vice President and Chief Operating Officer at the Performance Review Institute, said: "The Nadcap audit is tough and it is meant to be. The audit criteria are developed by experts from the aerospace and defense industry who are the best in their field, while the Nadcap audits are conducted by individuals who have dedicated an average of 30 years to their discipline. It's no wonder then that undertaking a Nadcap audit is hard, but DatapointLabs has met the challenge, and I congratulate them for achieving Nadcap accreditation for Non Metallic Materials Testing. Well done to everyone involved."

About Nadcap®
Created in 1990 by SAE International, Nadcap® is administered by the not-for-profit Performance Review Institute®. PRI is a global provider of customer-focused solutions designed to improve process and product quality by adding value, reducing total cost and promoting collaboration among stakeholders in industries where safety and quality are shared goals. PRI works closely with industry to understand their emerging needs and offers customized solutions in response. Learn more at www.p-r-i.org or contact PRI at PRI@p-r-i.org

About DatapointLabs
DatapointLabs is a US-based center of excellence for the measurement of physical properties of materials required for product development, CAE and R&D. Our ISO17025 and Nadcap accredited test laboratory provides 5-business-day turnaround on standard testing of virtually any materials used in the products of today and tomorrow. Our testing services, combined with our software for materials data management, Matereality, help companies build enduring data collections that accurately represent the materials used in their products. To date, more than 30,000 materials have flowed through the laboratory, providing data to over 1,200 companies around the world. In 2018, DatapointLabs joined the Laboratories Division of the Applus+ Group, a worldwide leader in the testing, inspection and certification sector.
